Fish hydrolysate	mL	5	25	50	75	250	500	1250	2500	50

## NOTES:

Amount of compost in recipe is NOT linear as tank size increases

Compost amounts are approximations and assumes compost moisture is correct

Organic amendment amounts in recipes are linear as tank size increases

Add Yucca to your pre-activations recipe and not your brewer to avoid foaming issues

**Add nothing with preservatives or antibiotics in it**

**Activation of all composts recommended for all brews and extracts**
